

# Aetheris R&D - Brian

---

Dear Brian,

As the frontend developer, you will focus on designing a highly interactive, user-friendly interface for Aetheris. Your work will explore the latest trends in UI/UX design and frontend technologies, making Aetheris both functional and engaging.

## Research Tasks

- Explore the latest trends in frontend technologies, especially those related to user interactivity and smooth animations.
- Analyze competitors' frontends and evaluate where Aetheris can introduce unique, visually appealing features.
- Research UI/UX design principles that can improve user experience and data interaction on Aetheris.
- Suggest potential enhancements in frontend development that can distinguish Aetheris from competitors in terms of performance and visuals.

## Expected Output

A UI/UX research report outlining opportunities to enhance user interaction and engagement, plus a plan for frontend improvements.

Please submit your research findings by 2nd November.

Best regards,  
Abhishek
